MANAGER'S REPORT

Market review:

During the second quarter, the Value Partners Classic Equity Fund recorded losses of 6.3%, while the MSCI Golden Dragon Index was down 5.2%, dragged by softened macroeconomic indicators as China's post-Covid recovery lost momentum. For the six months ending 30 June 2023, the Fund was down 2.5%, while the MSCI Golden Dragon Index performed 0.9%.¹

China's official manufacturing PMI fell below the 50-level threshold for three consecutive months in the second quarter. The country's consumer price index (CPI) was also at anemic levels, posing threats of deflation, while exports also declined in May, reversing a surprisingly positive growth in the previous two months. Within the property sector, new home sales also weakened in June. Adding to the market's worries include the youth unemployment rate (aged 16-24) rising to a record high and the weakening renminbi relative to the US dollar.

On a positive note, the government gave signals towards the end of the quarter that economic growth remains a key priority, with various easing measures to support the country's recovery. In June, the one- and five-year loan prime rates (LPRs), which are the reference rates for corporate loans and mortgages, respectively, were cut by 10bps. That said, expectations for more sizable stimulus packages, particularly targeting the property market, have not been met.

On the geopolitical front, communications between senior officials of China and the US, including the US State Secretary Blinken's visit to Beijing, indicate intentions of smoothening tensions. Meanwhile, Premier Li Qiang, who gave a keynote speech at the World Economic Forum, rejected the West's increasing rhetoric of "de-risking" from China and instead called for greater global cooperation. However, although these may help prevent tensions from further escalating, we have yet to see concrete steps to ease tensions.

Portfolio review:

From an absolute performance basis, the main detractor came from our holdings in the consumer discretionary sector, including internet and sportswear brand names, which were dragged by the softening consumer demand in China. Similarly, our exposure to financials, real estate, and consumer staples also detracted, given China's overall weakening post-Covid recovery momentum.

On the other hand, our exposure to select technology names in Taiwan was among the top contributors to the Fund's performance, given the sustained optimism toward the electronic sector, partly driven by the growing investments in artificial intelligence (AI). Our exposure to communications services also supported the Fund's performance, led by Chinese telecommunication operators, which were bolstered by expectations of SOE reforms. A traditional Chinese medicine (TCM) provider also supported the Fund's performance during the period, given the normalizing demand for healthcare services in China.

MANAGER'S REPORT (Continued)

Outlook:

Most market participants are looking forward to a Politburo meeting in July for any stimulus measures. However, we are more conservative about expectations of any large-scale stimulus during the meeting as top Chinese officials may still focus on institutional reforms. Nonetheless, more policies targeting structural reforms may only be unveiled during the third plenum and the National Financial Work Conference, which are usually held later in the year. In light of this, we expect volatility to remain in the near term.

Against this backdrop, we believe our long-held approach to identifying and investing in high-quality companies offers the best way to be more resilient against volatility and downside risks. We continue to focus on companies that generate sustainable returns to investors, especially those well-positioned to capture long-term secular trends, including consumption growth, internet services turnaround, technology innovation, and the growing demand for wealth management services in China.
