

# AMUNDI HK - BALANCED FUND

MONTHLY  
REPORT

28/03/2024

BALANCED ■

1. The Fund aims to achieve moderate long term capital growth through an actively managed portfolio of global equities, bonds and cash. The Fund will have limited RMB-denominated underlying investments.
2. Investing in this Fund may expose investors to equity, market and volatility risk, credit risk and counterparty risks. Investment in small and medium sized companies as well as emerging markets may involve a higher degree of risk. The use of financial derivative instruments for hedging and investment purposes may subject to additional risks, including liquidity, volatility, valuation and credit risk of the issuers.
3. As RMB is not freely convertible, the investment in RMB classes may be adversely affected by the fluctuation in the exchange rate between RMB and other foreign currencies and the liquidity of RMB at the relevant time. In case of sizable redemption requests for the RMB classes, the Manager has the absolute discretion to delay any payment of redemption requests from the RMB classes.
4. For hedged classes, there is no guarantee that the hedging techniques employed by the Manager will fully and effectively achieve the desired result and effect. Furthermore the volatility of the hedged classes may be higher than that of the equivalent class denominated in the Fund's base currency. If the counterparties of the instruments used for hedging purpose default, investors of the hedged classes may be exposed to currency exchange risk of the currency of denomination of the relevant class on an unhedged basis and may therefore suffer further losses.
5. The value of the Fund can be volatile and the Fund may suffer substantial loss.
6. For Distribution classes, the Manager may at its discretion determine to pay dividends out of income or capital of the Fund. In addition, the Manager may at its discretion pay dividends out of gross income while charging / paying all or part of the Fund's fees and expenses to the capital of the Fund, resulting in an increase in distributable income for the payment of dividends by the Fund, in which case, the Fund is effectively paying dividends out of capital. Payment of dividends out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Such distributions may result in an immediate reduction in the net asset value per unit of the Fund.
7. Investors should not make investment decisions solely based on this marketing material.

\*\* Annualised dividend yield = (1+monthly distribution per unit/ex-dividend NAV)<sup>12</sup>-1. The annualised dividend yield is calculated based on the last dividend distribution (ex-dividend date) with dividend reinvested, and may be higher or lower than the actual annual yield. Positive distribution yield does not imply positive return. Dividend is not guaranteed.
