Trustee's Report

HSBC Collective Investment Trust ("the Trust")

We hereby confirm that, in our opinion, the Manager of HSBC China Multi-Asset Income Fund, HSBC All China Bond Fund, HSBC Asia Pacific ex Japan Equity Volatility Focused Fund, HSBC Euro Multi-Asset Income Fund, HSBC Asia High Income Bond Fund, HSBC Asia Multi-Asset High Income Fund, HSBC Evolving Asia Equity Fund, HSBC Global Sustainable Multi Asset Income Fund and HSBC Global Diversified Real Return Fund within the Trust ("the sub-funds") has, in all material respects, managed the sub-funds in accordance with the provisions of the Trust Deed dated 27 February 2014 and 15 October 2020 for the year ended 31 March 2023.

) For and on behalf of
) HSBC Institutional Trust Services (Asia) Limited,
Trustee

31 July 2023

Independent Auditor's Report to the Unitholders of HSBC Collective Investment Trust

Report on the Audit of Financial Statements

Opinion

We have audited the financial statements of HSBC China Multi-Asset Income Fund, HSBC All China Bond Fund, HSBC Asia Pacific ex Japan Equity Volatility Focused Fund, HSBC Euro Multi-Asset Income Fund, HSBC Asia High Income Bond Fund, HSBC Asia Multi-Asset High Income Fund, HSBC Evolving Asia Equity Fund, HSBC Global Sustainable Multi Asset Income Fund and HSBC Global Diversified Real Return Fund ("the sub-funds") within HSBC Collective InvestmentTrust set out on pages 5 to 172, which comprise the statements of financial position as at 31 March 2023, the statements of comprehensive income, the statements of changes in net assets attributable to unitholders/statements of changes in equity and the cash flow statements for the year then ended, and notes to the financial statements, including a summary of significant accounting policies and other explanatory information.

In our opinion, the financial statements give a true and fair view of the financial disposition of the sub-funds at 31 March 2023 and of their financial transactions and cash flows for the year then ended in accordance with Hong Kong Financial Reporting Standards ("HKFRSs") issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA").

Basis for Opinion

We conducted our audit in accordance with Hong Kong Standards on Auditing ("HKSAs") issued by the HKICPA. Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report. We are independent of the sub-funds in accordance with the HKICPA's Code of Ethics for Professional Accountants ("the Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Information Other than the Financial Statements and Auditor's Report Thereon

The Manager and the Trustee of the sub-funds are responsible for the other information. The other information comprises all the information included in the annual report, other than the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Manager and the Trustee of the Sub-Funds for the Financial Statements

The Manager and the Trustee of the sub-funds are responsible for the preparation and fair presentation of financial statements that give a true and fair view in accordance with HKFRSs issued by the HKICPA and for such internal control as the Manager and the Trustee determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Manager and the Trustee of the sub-funds are responsible for assessing the sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Manager and the Trustee of the sub-funds either intend to liquidate the sub-funds or to cease operations, or have no realistic alternative but to do so.

Independent Auditor's Report to the Unitholders of HSBC Collective Investment Trust

Responsibilities of the Manager and the Trustee of the Sub-Funds for the Financial Statements (continued)

In addition, the Manager and the Trustee of the sub-funds are required to ensure that the financial statements have been properly prepared in accordance with the relevant provisions of the Trust Deed, as amended, ("the Trust Deed") and the relevant disclosure provisions of Appendix E of the Code on Unit Trusts and Mutual Funds ("the SFC Code") issued by the Hong Kong Securities and Futures Commission.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. This report is made solely to you, as a body, and, for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements. In addition, we are required to assess whether the financial statements of the sub-funds have been properly prepared, in all material respects, in accordance with the relevant provisions of the Trust Deed and the relevant disclosure provisions of Appendix E of the SFC Code.

As part of an audit in accordance with HKSAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design
 and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to
 provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for
 one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override
 of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate
 in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the sub-funds' internal
 control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Manager and the Trustee of the sub-funds.
- Conclude on the appropriateness of the Manager's and the Trustee's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the sub-funds to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether
 the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the Manager and the Trustee of the sub-funds regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit

Independent Auditor's Report to the Unitholders of HSBC Collective Investment Trust

Report on matters under the relevant provisions of the Trust Deed and the relevant disclosure provisions of Appendix E to the SFC Code

In our opinion, the financial statements have been properly prepared, in all material respects, in accordance with the relevant provisions of the Trust Deed and the relevant disclosure provisions of Appendix E of the SFC Code.

1 The Trust

HSBC China Multi-Asset Income Fund, HSBC All China Bond Fund, HSBC Asia Pacific ex Japan Equity Volatility Focused Fund, HSBC Euro Multi-Asset Income Fund, HSBC Asia High Income Bond Fund, HSBC Asia Multi-Asset High Income Fund, HSBC Evolving Asia Equity Fund, HSBC Global Sustainable Multi Asset Income Fund and HSBC Global Diversified Real Return Fund ("the sub-funds") presented in the financial statements represent the sub-funds within HSBC Collective Investment Trust ("the Trust") which is an open-ended umbrella unit trust established under the laws of Hong Kong by its Trust Deed dated 27 February 2014 and 15 October 2020, as amended, ("the Trust Deed"). These sub-funds were launched on the dates of commencement as set out below:

Dates of commencement

| HSBC China Multi-Asset Income Fund | 21 November 2014 |

| Fund | |

HSBC China Multi-Asset Income Fund aims to provide income and moderate capital growth, through an active asset allocation in a diversified portfolio of a minimum of 70% of its net asset value in fixed income and equity securities as well as money market and cash instruments that are related to China.

HSBC All China Bond Fund aims to invest for total return (i.e. via both income and capital appreciation), through investments primarily in a portfolio of onshore and offshore Mainland Chinese fixed income securities. The sub-fund invests primarily in fixed income securities including:

- offshore fixed income securities denominated in any currencies and issued outside Mainland China by the Mainland China government or Mainland China companies:
- offshore RMB denominated fixed income securities issued outside Mainland China by non-Mainland China entities:

- onshore fixed income securities denominated in RMB, issued within Mainland China and traded on the China Interbank Bond Market through Bond Connect, the RQFII quota of the Investment Adviser and/or other means as may be permitted by the relevant regulations from time to time:
- onshore exchange traded fixed income securities issued within Mainland China and traded on the stock exchanges in Mainland China through the RQFII quota of the Investment Adviser.

HSBC Asia Pacific ex Japan Equity Volatility Focused Fund aims to provide long-term total return by investing in a portfolio of equities and invests (normally a minimum 90% of its net assets) in equities and equity equivalent securities of companies which have their registered office in, and with an official listing on a major stock exchange or other regulated market of any Asia Pacific country (excluding Japan) as well as companies which carry out a preponderant part of their economic activities in the Asia Pacific region (excluding Japan). The sub-fund may invest the remaining assets in money market instruments, cash instruments and cash.

HSBC Euro Multi-Asset Income Fund aims to provide income and moderate capital growth through a diversified portfolio of Eurozone equities, Euro-denominated fixed income securities as well as money market instruments, cash instruments and collective investment schemes that invests in Eurozone securities.

HSBC Asia High Income Bond Fund aims to invest in fixed income securities which provide higher yield compared to their peers and the potential for capital appreciation over the medium to long-term. A minimum of 70% of the sub-fund's net asset value will be invested in a diversified portfolio of fixed income securities issued or guaranteed by government, government agencies or supranational bodies in Asia, or issued by companies which are domiciled in, based in or carry out the larger part of their business in Asia.

HSBC Asia-Multi Asset Income Fund aims to provide income through investment in a diversified portfolio of equities, fixed income securities, money market securities and cash instruments and other instruments that are related to the Asia Pacific region.

HSBC Evolving Asia Equity Fund aims to provide long-term total return by investing in a portfolio of equities.

HSBC Global Sustainable Multi Asset Income Fund aims to provide income with moderate capital growth through investment in a diversified portfolio of global assets that form

part of sustainable investment strategies. Through investment in Sustainable Assets, the Sub-Fund aims to invest in a portfolio with a higher weighted average environmental, social and governance ("ESG") score ("ESG Score") and lower weighted average carbon intensity ratings ("Carbon Intensity Ratings") than if it invested in an equivalent portfolio of standard market capitalisation indices.

HSBC Global Diversified Real Return Fund aims to deliver return that targets to exceed US inflation (Real Return) over the long term through investment in a diversified portfolio of equity and fixed income securities, money market and cash instruments as well as other instruments such as commodities related instruments and collective investment schemes which adopt liquid alternative strategies (e.g. market neutral strategies and momentum strategies).

The sub-funds are authorised by the Securities and Futures Commission in Hong Kong ("the SFC") under Section 104 of the Hong Kong Securities and Futures Ordinance and are governed by the Hong Kong Code on Unit Trusts and Mutual Funds ("the SFC Code") issued by the SFC.

The Trust Deed does not contain any requirement that a combined set of financial statements for the Trust itself be prepared.

2 Significant accounting policies

(a) Statement of compliance

The financial statements have been prepared in accordance with all applicable Hong Kong Financial Reporting Standards ("HKFRSs"), which collective term includes all applicable individual Hong Kong Financial Reporting Standards, Hong Kong Accounting Standards ("HKASs") and Interpretations issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"), accounting principles generally accepted in Hong Kong, the relevant disclosure provisions of the Trust Deed, as amended, and the relevant disclosure requirements of the SFC Code issued by the SFC. A summary of the significant accounting policies adopted by the subfunds is set out below.

The HKICPA has issued certain new and revised HKFRSs that are first effective or available for early adoption for the current accounting year of the sub-funds. Note 3 provides information on any changes in accounting policies resulting from initial application of these developments to the extent that they are relevant to the sub-funds for the current and prior accounting years reflected in these financial statements.

(b) Basis of preparation of the financial statements

The functional and presentation currency of HSBC China Multi-Asset Income Fund is the Hong Kong dollar, the functional and presentation currency of HSBC All China Bond Fund is the Renminbi, the functional and presentation currency of HSBC Asia Pacific ex Japan Equity Volatility Focused Fund is the United States dollar, the functional and presentation currency of HSBC Euro Multi-Asset Income Fund is the Euro, the functional and presentation currency of HSBC Asia High Income Bond Fund is the United States dollar, the functional and presentation currency of HSBC Asia Multi Asset High Income Fund is the United States dollar. the functional and presentation currency of HSBC Evolving Asia Equity Fund is the United States dollar, the functional and presentation currency of HSBC Global Sustainable Multi Asset Income Fund is the United States dollar, the functional and presentation currency of Global Diversified Real Return Fund is the United States dollar.

The financial statements are prepared on a fair value basis for financial assets and financial liabilities at fair value through profit or loss. Other financial assets and financial liabilities are stated at amortised cost or redemption amount (redeemable units).

The preparation of financial statements in conformity with HKFRSs requires the Manager and the Trustee to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

(c) Translation of foreign currency

Foreign currency transactions during the year are translated into functional and presentation currencies of the sub-funds at the exchange rates ruling at the transaction dates. Monetary assets and liabilities denominated in foreign currencies that are stated at fair value are translated into functional and presentation currencies of the sub-funds at

the foreign exchange rates ruling at the date of the statement of assets and liabilities.

Foreign currency exchange differences arising on translation and realised gains and losses on disposal or settlement of monetary assets and liabilities are recognised in profit or loss. Foreign currency exchange differences relating to financial assets at fair value through profit or loss are included in net gains from financial assets at fair value through profit or loss. All other foreign currency exchange differences relating to monetary items including cash and cash equivalents are presented separately in profit or loss.

(d) Financial instruments

(i) Classification

On initial recognition, the sub-funds classify financial assets as measured at amortised cost or fair value through profit or loss.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at fair value through profit or loss:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest ("SPPI").

All other financial assets of the sub-funds are measured at fair value through profit or loss.

Business model assessment

In making an assessment of the objective of the business model in which a financial asset is held, the sub-funds consider all of the relevant information about how the business is managed, including:

 the documented investment strategy and the execution of this strategy in practice. This includes whether the investment strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;

- how the performance of the portfolio is evaluated and reported to the sub-funds' management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how the investment manager is compensated:
 e.g. whether compensation is based on the fair
 value of the assets managed or the contractual
 cash flows collected; and
- the frequency, volume and timing of sales of financial assets in prior years, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the sub-funds' continuing recognition of the assets.

The sub-funds have determined that they have two business models

- Held-to-collect business model: this includes dividend receivable, interest receivable, subscription receivable, amounts due from brokers, other receivable and cash and cash equivalents. These financial assets are held to collect contractual cash flow.
- Other business model: this includes debt instruments, equity instruments, collective investment schemes and derivatives. These financial assets are managed and their performance is evaluated, on a fair value basis, with frequent sales taking place.

Assessment whether contractual cash flows are SPPI

For the purposes of this assessment, "principal" is defined as the fair value of the financial asset on initial recognition. "Interest" is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are SPPI, the sub-funds consider the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the sub-funds consider:

- contingent events that would change the amount or timing of cash flows;
- leverage features;
- prepayment and extension features;
- terms that limit the sub-funds' claim to cash flows from specified assets (e.g. non-recourse features); and
- features that modify consideration for of the time value of money (e.g. periodical reset of interest rates).

The sub-funds classify their investments based on the business model and contractual cash flows assessment. Accordingly, the sub-funds classify all their investments, including debt instruments, equity instruments, collective investment schemes and derivatives, into financial assets at fair value through profit or loss category. Financial assets measured at amortised cost include dividend receivable, interest receivable, subscription receivable, amounts due from brokers, other receivable and cash and cash equivalents. Financial liabilities that are not at fair value through profit or loss include bank overdraft, redemption payable, amounts due to brokers, distribution payable, tax payables and other payables.

All derivatives in a net receivable position (positive fair value) are reported as financial assets. All derivatives in a net payable position (negative fair value) are reported as financial liabilities.

Reclassifications

Financial assets are not reclassified subsequent to their initial recognition unless the sub-funds were to change its business model for managing financial assets, in which case all affected financial assets would be reclassified on the first day of the first reporting period following the change in the business model.

(ii) Recognition

The sub-funds recognise financial assets and financial liabilities on the date they become a party to the contractual provisions of the instruments.

A regular way purchase or sale of financial assets and financial liabilities is recognised using trade date accounting. From this date, any gains and losses arising from changes in fair value of the financial assets or financial liabilities are recorded.

Financial liabilities are not recognised unless one of the parties has performed their obligations under the contract or the contract is a derivative contract not exempted from the scope of HKFRS 9.

(iii) Measurement

Financial instruments are measured initially at fair value (transaction price). Transaction costs on financial assets and liabilities at fair value through profit or loss are expensed immediately, while those on other financial instruments are amortised.

Subsequent to initial recognition, all instruments classified at fair value through profit or loss are measured at fair value with changes in their fair value recognised in profit or loss in the year in which they arise.

Financial assets classified measured at amortised cost are carried at amortised cost using the effective interest rate method, less impairment losses, if any.

Financial liabilities, other than those at fair value through profit or loss, are measured at amortised cost using the effective interest rate method. Financial liabilities arising from the redeemable units issued by the sub-funds are carried at the redemption amount representing the unitholders' right to a residual interest in the sub-funds' assets.

(iv) Fair value measurement principles

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the sub-funds have access at that date. The fair value of a liability reflects its non-performance risk.

When available, the sub-funds measure the fair value of an instrument using the quoted price in an active market for that instrument provided such price is within the bid-ask spread. A market is regarded as active if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. In circumstances where the quoted price is not within the bid-ask spread, the manager of the sub-funds will determine the points within the bid-ask spreads that are most representative of the fair value.

When there is no quoted price in an active market, the sub-funds use valuation techniques that maximise the use of relevant observable inputs and minimise the use of unobservable inputs. The chosen valuation technique incorporates all the factors that market participants would take into account in pricing a transaction.

The best evidence of the fair value of a financial instrument at initial recognition is normally the transaction price - i.e. the fair value of the consideration given or received. If the sub-funds determine that the fair value at initial recognition differs from the transaction price and the fair value is evidenced neither by a quoted price in an active market for an identical asset or liability nor based on a valuation technique that uses only data from observable markets, the financial instrument is initially measured at fair value, adjusted to defer the difference between the fair value at initial recognition and the transaction price. Subsequently, that difference is recognised in profit or loss on an appropriate basis over the life of the instrument but no later than when the valuation is supported wholly by observable market data or the transaction is closed OUT

Portfolios of financial assets and financial liabilities that are exposed to market risk and credit risk that are managed by the sub-funds on the basis of the net exposure to either market or credit risk, are measured on the basis of a price that would be received to sell a net long position (or paid to transfer a net short position) for a particular risk exposure. Those portfolio-level adjustments are allocated to the individual assets and liabilities on the basis of the relative risk adjustment of each of the individual instruments in the portfolio.

The sub-funds recognise transfers between levels of the fair value hierarchy as at the end of the reporting period during which the change has occurred.

(v) Impairment

The sub-funds recognise loss allowances for expected credit losses ("ECLs") on financial assets measured at amortised cost.

The sub-funds measure loss allowances at an amount equal to lifetime ECLs, except for the following, which are measured at 12-month ECLs:

- financial assets that are determined to have low credit risk at the reporting date; and
- other financial assets for which credit risk (i.e. the risk of default occurring over the expected life of the asset) has not increased significantly since initial recognition.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the sub-funds consider reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the sub-funds historical experience and informed credit assessment and including forward-looking information.

The sub-funds assume that the credit risk on a financial asset has increased significantly if it is more than 30 days past due.

The sub-funds consider a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the sub-funds in full, without recourse by the sub-funds to actions such as realising security (if any is held); or
- the financial asset is more than 90 days past due.

The sub-funds consider a financial asset to have low credit risk when the credit rating of the counterparty is equivalent to the globally understood definition of 'investment grade'. The sub-funds consider this to be Baa3 or higher per Moody's or BBB- or higher per Standard & Poor's ("S&P").

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECLs is the maximum contractual period over which the sub-funds is exposed to credit risk.

Measurement of FCLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the sub-funds expect to receive). ECLs are discounted at the effective interest rate of the financial asset.

Credit-impaired financial assets

At each reporting date, the sub-funds assess whether financial assets carried at amortised cost are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer:
- a breach of contract such as a default or being more than 90 days past due; or
- it is probable that the borrower will enter bankruptcy or other financial reorganisation.

Presentation of allowance for ECLs in the statement of assets and liabilities

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

Write-off

The gross carrying amount of a financial asset is written off when the sub-funds have no reasonable expectations of recovering a financial asset in its entirety or a portion thereof.

(vi) Derecognition

The sub-funds derecognise a financial asset when the contractual rights to receive the cash flows from the financial assets expire or they transfer the financial asset and the transfer qualifies for derecognition in accordance with HKFRS 9.

The sub-funds use the weighted average method to determine realised gains and losses on derecognition.

A financial liability is derecognised when the obligation specified in the contract is discharged, cancelled or has expired.

(vii) Offsetting

Financial assets and liabilities are offset and the net amount is reported in the statement of assets and liabilities when, and only when, the sub-funds have a legally enforceable right to offset the recognised amounts and the transactions are intended either to be settled on a net basis or simultaneously, e.g. through a market clearing mechanism.

(viii) Specific instruments

Cash and cash equivalents

Cash and cash equivalents comprise current deposits with banks and short-term highly liquid investments that are readily convertible to known amounts of cash, are subject to an insignificant risk of changes in value, and are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes. Bank overdrafts that are repayable on demand and form an integral part of the company's cash management are also included as a component of cash and cash equivalents for the purpose of the cash flow statement.

(e) Revenue recognition

Revenue is recognised in profit or loss as follows:

Dividend income

Dividend income from listed investments is recognised when the share price of the investment goes ex-dividend. Dividends from other investments are recognised in profit or loss as dividend income when declared

Interest income

Interest income is recognised in profit or loss as it accrues under the effective interest rate method using the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the gross carrying amount of the financial asset. Interest income includes interest from cash and cash equivalents. Interest income from financial assets at fair value through profit or loss includes interest from debt securities.

Interest income is recognised on a gross basis, including withholding tax, if any.

(f) Expenses

All expenses are recognised in profit or loss on an accrual basis

(a) Taxation

Taxation comprises current tax and deferred tax. Current tax and movements in deferred tax assets and liabilities are recognised in the statement of comprehensive income.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the date of the statement of assets and liabilities.

Deferred tax liabilities arise from deductible and taxable temporary differences, being the differences between the carrying amounts of assets and liabilities for financial reporting purposes and their tax bases.

Apart from certain limited exceptions, all deferred tax liabilities, and all deferred tax assets to the extent that is probable that future taxable profits will be available against which the asset can be utilised, are recognised.

(h) Structured entities

A structured entity is an entity that has been designed so that voting or similar rights are not the dominant factor in deciding who controls the entity, such as when any voting rights relate to administrative tasks only and the relevant activities are directed by means of contractual arrangements. A structured entity often has some or all of the following features or attributes: (a) restricted activities; (b) a narrow and well-defined objective, such as to provide investment opportunities for investors by passing on risks and rewards associated with the assets of the structured entity to investors; (c) insufficient equity to permit the structured entity to finance its activities without subordinated financial support;

and (d) financing in the form of multiple contractually linked instruments to investors that create concentrations of credit or other risks (tranches).

The sub-funds consider all of their investments in other funds ("underlying funds") to be investments in unconsolidated structured entities. The sub-funds invest in underlying funds whose objectives range from achieving medium to long-term capital growth and whose investment strategy does not include the use of leverage.

(i) Foreign exchange gains and losses

Foreign exchange gains and losses on financial assets and financial liabilities at fair value through profit or loss are recognised together with other changes in the fair value. Included in profit or loss line item Net foreign exchange gain/ (loss) are net foreign exchange gains and losses on financial assets and financial liabilities other than those classified as fair value through profit or loss.

(i) Establishment cost

The establishment costs of the sub-funds consist of costs incurred to establish the sub-funds and enable them legally to do business. The establishment costs are recognised as an expense in the period in which they are incurred.

(k) Related parties

- (a) A person, or a close member of that person's family, is related to the Trust if that person:
 - (i) has control or joint control over the Trust;
 - (ii) has significant influence over the Trust; or
 - (iii) is a member of the key management personnel of the Trust.
- (b) An entity is related to the Trust if any of the following conditions applies:
 - The entity and the Trust are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others);
 - (ii) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member):

- (iii) Both entities are joint ventures of the same third party;
- (iv) One entity is a joint venture of a third entity and the other entity is an associate of the third entity;
- The entity is a post-employment benefit plan for the benefit of employees of either the Trust or an entity related to the Trust;
- (vi) The entity is controlled or jointly controlled by a person identified in (a):
- (vii) A person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity); or
- (viii) The entity, or any member of a group of which it is a part, provides key management personnel services to the Trust.

Close members of the family of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the entity.

(I) Subscriptions and redemptions

The sub-funds recognise unitholders' subscriptions and allots units upon receipt of a valid subscription application and derecognise them upon receipt of a valid redemption application.

(m) Units in issue

The sub-funds classify financial instruments issued as financial liabilities or equity instruments in accordance with the substance of the contractual terms of the instruments.

A puttable financial instrument that includes a contractual obligation for the issuer to repurchase or redeem that instrument for cash or another financial asset is classified as an equity instrument if it meets the following conditions:

- it entitles the holder to a pro rata share of the sub funds' net assets in the event of the sub funds' liquidation;
- (ii) it is in the class of instruments that is subordinate to all other classes of instruments:
- all financial instruments in the class of instruments that is subordinate to all other classes of instruments have identical features;

- (iv) apart from the contractual obligation for the sub funds to repurchase or redeem the instrument for cash or another financial asset, the instrument does not include any other features that would require classification as a liability; and
- (v) the total expected cash flows attributable to the instrument over its life are based substantially on profit or loss, the change in the recognised net assets or the change in the fair value of the recognised and unrecognised net assets of the sub-funds over the life of the instrument.

All sub-funds have multiple classes of redeemable units in issue. All the classes are the most subordinate classes of financial instruments in the respective sub funds and rank pari passu in all material respects and have the same terms and conditions other than different currencies and management fees rates, and/or different distribution policies, etc. The redeemable units provide unitholders with the right to require redemption for cash at a value proportionate to the unitholders' share in the sub funds' net assets at each redemption date, and also in the event of the sub funds' liquidation. The redeemable units of these sub funds are classified as financial liabilities and are measured at the present value of the redemption amounts.

(n) Distributions to holders of redeemable units

Distributions to holders of redeemable units classified as financial liabilities are recognised in profit or loss as finance costs when they are authorised and no longer at the discretion of the sub-funds.

(o) Transaction costs

Transactions costs are costs incurred to purchase/sale of financial assets or liabilities at fair value through profit or loss. They include fees and commissions paid to agents, brokers and dealers. Transaction costs, when incurred, are immediately recognised in profit or loss as an expense.

(p) Cash collateral

Cash collateral provided by the Sub-Fund is identified in the statement of assets and liabilities as margin cash and is not included as a component of cash and cash equivalents. For collateral other than cash, if the party to whom the collateral is provided has the right by contract or custom to sell or re-pledge the collateral, the Sub-Fund classifies that asset in its statement of financial position separately from other assets and identifies the assets as pledged collateral. Where the party to whom the collateral is provided does not have the right to sell or re-pledge, a disclosure of the collateral provided is made in the notes to the financial statements.

3 Changes in accounting policies

The HKICPA has issued certain amendments to HKFRSs that are first effective for the current accounting year of the Subfunds. None of these developments have had a material effect on how the Sub-funds' result and financial position for the current or prior years have been prepared or presented in this financial report. The Sub-funds have not applied any new standard or interpretation that is not yet effective for the current accounting year (see note 15).

5 Taxation

No provision for Hong Kong Profits Tax has been made in the financial statements as the sub-funds are exempted from taxation under section 26A (1A) of the Hong Kong Inland Revenue Ordinance.

Capital gains, interest and dividend income received by the sub-funds may be subject to non-recoverable withholding tax imposed in the country of origin. Capital gains and investment income are recorded gross of such taxes and the withholding tax is recognised in profit or loss as taxation expenses as incurred.

Under the current general provisions of the PRC Corporate Income Tax ("CIT") Law and published tax circulars, the subfunds would be subject to PRC withholding tax at the rate of 10% in respect of its PRC sourced income earned, including capital gains realised on the sales of PRC A Shares, B Shares, H Shares listed companies and PRC bonds, dividend income derived from PRC A Shares, B Shares and H Shares listed companies and interest income earned in respect of PRC bank deposits and corporate bonds. This withholding taxation basis should apply as it is intended that the sub-funds would be managed and operated in such a manner that it would not be considered a tax resident enterprise in China or otherwise as having a taxable permanent establishment in the PRC. The 10% withholding tax rate may be further reduced under an applicable tax treaty which the PRC has entered into with the jurisdiction in which the beneficial owner of the relevant income is a resident.

The Explanatory Memorandum of the sub-funds give the Manager the right to provide for withholding tax on such gains or income and withhold the tax for the account of the sub-funds. On the basis of the available information, the Manager has determined that it is appropriate to provide for PRC taxation at the withholding tax rate of 10% on realised gains on PRC bonds, dividend income from A Shares, B Shares and H Shares, and interest income from PRC bank deposits and corporate bonds in the financial statements.

Effective from 14 November 2014, the Ministry of Finance("MOF"), the State Administration of Tax ("SAT") and the China Securities Regulatory Commission have jointly promulgated the Circular Concerning the Temporary Exemption of the Enterprise Income Tax for Gains Earned by Qualified Foreign Institutional Investors and Renminbi Qualified Foreign Institutional Investors from the Transfer of Domestic Shares and Other Equity Interest Investment in China and Circular on the Taxation Policy of the Pilot Programme for the Mutual Stock Market Access between Shanghai and Hong Kong Stock Markets.

As a result of the announcement of the Circulars the subfunds will not withhold 10% of realised and unrealised gains on their investments in China A-Shares Access Products and China A-Shares through Shanghai-Hong Kong Stock Connect as tax provisions.

For the HSBC All China Bond Fund ("CFIF"), the Manager after making assessment and having taken and considered independent professional tax advice and acting based on such advice, considered that CFIF should qualify as a Hong Kong tax resident. The Manager then issued a notice on 11 January 2016 to inform CFIF's unitholders that as from 21 December 2015, no tax provision would be made on the gross realised and unrealised capital gains derived from the disposal of investment in PRC onshore bonds, and the tax provisions previously made in respect of CFIF's investments would be reversed.

In November 2018, the MOF and the SAT jointly issued [Caishui [2018] No. 108] ("Circular 108") which provides that foreign institutional investors are exempted from Mainland China CIT and VAT in respect of bond interest income received from 7 November 2018 to 6 November 2021 ("Tax Exempt Period") from investments in the Mainland China onshore bond market.

Such CIT exemption does not apply to foreign institutional investors having "an establishment or place of business" or "permanent establishment" in Mainland China and deriving bond interest income therefrom.

Based on the prevailing VAT regulations, coupon interest derived by a sub-fund from Mainland China onshore non-government bonds and offshore bonds issued by Mainland China tax resident companies ("relevant bonds") should be subject to VAT at 6% plus local surcharges from 1 May 2016.

Taxation in statement of comprehensive income represents:

9 Reconciliation of net asset values

The net asset value presented in the financial statements and that quoted for pricing purposes at the period end ("Dealing NAV") are different as the principles for calculating the Dealing NAV as set out in the Explanatory Memorandum are different from those required for financial reporting purposes under HKFRSs. The following reconciliation provides details of these differences:

| | | 2023 | |
|---|---|---------------------------------------|--|
| | HSBC China Multi-Asset Income Fund HKD | HSBC All China Bond Fund RMB | HSBC Asia Pacific ex Japan Equity Volatility Focused Fund USD |
| Net assets as reported in the financial statements as at 31 March Adjustment for different basis adopted by the sub-funds in arriving at the Dealing NAV: — Establishment cost | 5,770,711,935 | 1,082,502,635 | 55,119,016 |
| Dealing NAV as at 31 March | 5,770,711,935 | 1,082,502,635 | 55,119,016 |

10 Involvement with unconsolidated structured entities

The sub-funds have concluded that the investment funds in which they invest but are not consolidated by the sub-funds meet the definition of structured entities because:

- the voting rights in the investment funds are not dominant rights in deciding who controls them as they relate to administrative tasks only;
- each investment fund's activities are restricted by its prospectus; and
- the investment funds have narrow and well-defined objectives to provide investment opportunities to investors.

| The table below describes the types of structured entities |

During the year, the sub-funds did not provide financial support to unconsolidated structured entities and have no intention of providing financial or other support.

11 Financial instruments and associated risks

The sub-funds' investing activities expose them to various types of risks that are associated with the financial instruments and markets in which they invest. The Manager and the Trustee have set out below the most important types of financial risks inherent in each type of financial instruments. The Manager and the Trustee would like to highlight that the following list of associated risks only sets out some of the risks but does not purport to constitute an exhaustive list of all the risks inherent in an investment in the sub-funds. Unitholders should note that additional information in respect of risks associated with financial instruments in the sub-funds can be found in the sub-funds' Explanatory Memorandum.

The nature and extent of the financial instruments outstanding at the date of the statement of assets and liabilities and the risk management policies employed by the sub-funds are discussed below.

(a) Price risk

Price risk is the risk that value of the instrument will fluctuate as a result of changes in market prices, whether caused by factors specific to an individual investment, its issuer or all factors affecting all instruments traded in the market.

The sub-funds are exposed to price risk arising from changes in market price. Price risk is managed by investing in a portfolio of different investments in accordance with the investments objectives of the sub-funds.

Price sensitivity

The impact of a 10% (2022: 10%) increase in value of the investments at 31 March 2023, with all other variables held constant, is shown below. An equal change in the opposite direction would have reduced the net asset value by an equal but opposite amount.

Interest rate sensitivity

At the date of the statement of assets and liabilities, assuming all other factors remain unchanged, it is estimated that an increase in interest rate of 50 basis points (2022: 100 basis points) would result in decrease in the net assets attributable to the unitholders and the profit for the year as set out in the below table; an equal change in the opposite direction would result in increase in the net assets attributable to unitholders by an equal amount.

Change in net assets if interest rate increased by 100 bps

As at 31 March 2023

| HSBC China Multi-Asset Income Fund | HKD | 68,884,768 |

As HSBC Asia Pacific ex Japan Equity Volatility Focused Fund, HSBC Evolving Asia Equity Fund, HSBC Global Sustainable Multi Asset Income Fund and HSBC Global Diversified Real Return Fund did not hold any interest-bearing assets as at 31 March 2023 and 2022, the Manager considers the subfund is not subject to significant interest rate risk. No sensitivity analysis is performed for the years ended 31 March 2023 and 2022.

(c) Currency risk

The sub-funds may invest in financial investments and enter into transactions denominated in currencies other than their respective functional currencies. Consequently, the sub-funds are exposed to risks that the exchange rate of their

respective functional currencies relative to other foreign currencies may change in a manner that has an adverse effect on the value of that portion of the sub-funds' assets or liabilities denominated in currencies other than their respective functional currencies.

The fluctuations in the rate of exchange between the currency in which the asset or liability is denominated and the functional currency could result in an appreciation or depreciation in the fair value of that asset or liability. The Manager may attempt to mitigate this risk by using financial derivative instruments.

In accordance with the sub-funds' policy, the Manager monitors the sub-funds' currency exposures on an ongoing basis.

The sub-funds' major exposures in foreign currency exchange rates at the end of reporting period are as follows:

The amounts in the above table are based on the carrying value of the assets and liabilities.

Currency sensitivity

As the Hong Kong dollar ("HKD") is pegged to the United States dollar ("USD"), the sub-funds do not expect any significant movements in USD/HKD exchange rate. At 31 March 2023 and 2022, had the sub-funds' respective functional currencies weakened in relation to the above currencies by 10%, with all other variables held constant, net assets attributable to unitholders would have changed by the amounts shown in the following table.

Change in net assets if the sub-funds' respective functional currencies weakened by 10%

190,496,917

| HSBC Global Diversified Real Return Fund | USD | - |
| | | |

A 10% strengthening of the sub-funds' respective functional currencies against the above currencies would have resulted in an equal but opposite effect on the basis that all other variables remain constant.

(d) Credit and counterparty risk

Credit risk is the risk that counterparty to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the sub-funds. The sub-funds' exposure to credit risk is monitored by the Manager on an ongoing basis.

At 31 March 2023 and 2022, all of the sub-funds' financial assets were exposed to credit risk. These include investments and cash and cash equivalents placed with banks and the custodian.

The majority of the cash held by the sub-funds is deposited with HSBC Hong Kong and Bank of Communications Co., Ltd. Bankruptcy or insolvency of the banks may cause the sub-funds' rights with respect to the cash held by the bank to be delayed or limited. The Manager monitors the credit rating and financial position of the banks on an ongoing basis.

Substantially all the assets of the sub-funds are held by the custodian. Bankruptcy or insolvency of the custodian may cause the sub-funds' right with respect to securities held by the custodian to be delayed or limited. The Manager monitors the credit rating and financial position of the custodian on an ongoing basis.

At the date of statement of assets and liabilities, the subfunds, HSBC China Multi-Asset Income Fund, HSBC All China Bond Fund, HSBC Euro Multi-Asset Income Fund, HSBC Asia High Income Bond Fund and HSBC Asia Multi-Asset High Income Fund have invested in debt securities with the following credit quality expressed as a percentage of their net assets:

| Ca | 0.11 | _ | | |
| NR | 10.94 | 14.91 | Credit risk arising from tran | sactions with brok |
| Total | 92.92 | 99.61 | transactions awaiting settle | ment. Risk relatin |

Credit risk arising from transactions with brokers relates to transactions awaiting settlement. Risk relating to unsettled transactions is considered small due to the short settlement period involved and the high credit quality of the brokers used.

The carrying amounts of financial assets best represent the maximum credit risk exposure at the date of statement of assets and liabilities.

As at 31 March 2023 and 2022, there were no significant concentrations of credit risk to counterparties except to the custodian. The Manager considers that none of these assets are impaired nor past due at the end of the reporting periods.

Amounts arising from ECL

Impairment on dividend receivable, interest receivable, subscription receivable, amounts due from brokers, other receivable and cash and cash equivalents has been measured on a 12-month expected loss basis and reflects the short maturities of the exposures. The sub-funds consider that these exposures have low credit risk based on the external credit ratings of the counterparties.

The sub-funds monitors changes in credit risk on these exposures by tracking published external credit ratings of the counterparties and/or performed ongoing review of the counterparties.

The Managers considers the probability of default to be minimal as the counterparties have a strong capacity to meet their contractual obligations in the near term. There is no impairment allowance recognised on dividend receivable, interest receivable, Subscription receivable, amounts due from brokers, other receivable and cash and cash equivalents. The amount of the loss allowance did not change during the year ended 31 March 2023.

(e) Liquidity risk

Liquidity risk arises from the risk that Manager may not be able to convert investments into cash to meet liquidity needs in a timely manner. The sub-funds are exposed to daily liquidity risk on redemption of units.

The sub-funds' policy is to regularly monitor current and expected liquidity requirements to ensure that it maintains sufficient reserves of cash and readily realisable marketable securities to meet its liquidity requirements in the short and longer term.

The sub-funds' listed and quoted investments are considered to have insignificant exposures to liquidity risk as they are all readily realisable under normal market conditions.

HSBC China Multi-Asset Income Fund, HSBC All China Bond Fund, HSBC Asia High Income Bond Fund and HSBC Asia Multi-Asset High Income Fund however, also invests in unlisted bonds, which are not publicly traded on exchanges and may be illiquid. The total value of unlisted bonds as at 31 March 2023 was HKD397,247,678 (2022: HKD347,622,979), RMB114,591,832 (2022: RMB111,950,122), USD1,137,594 (2022: USD4,337,604) and USD535,087 (2022: USD2,304,759) respectively.

As at 31 March 2023 and 2022, the sub-funds' financial liabilities were due within one year.

(f) Capital management

The sub-funds' capital as at the period end date is represented by their redeemable units.

The sub-funds' objective in managing the capital is to ensure a stable and strong base to achieve long-term capital growth, and to manage liquidity risk arising from the redemptions. The Manager manages the capital of the sub-funds in accordance with the sub-funds' investment objectives and policies stated in the sub-funds' Explanatory Memorandum.

There were no changes in the policies and procedures during the year with respect to the sub-funds' approach to its capital management.

The amount and the movement of net assets attributable to unitholders are stated in the statement of changes in net assets attributable to unitholders. As the redeemable units are redeemed on demand at the unitholders' option, the actual level of redemption may differ significantly from historic experience.

(a) Specific instruments

As at 31 March 2023 and 2022, the sub-funds' holdings in foreign exchange forward contracts are summarized in the following table.

Forward contracts are commitments either to purchase or sell a designated financial instrument, currency, commodity or index at a specified future date for a specified price and may be settled in cash or the underlying financial asset.

Forward contracts result in exposure to market risk based on changes in market prices relative to contracted prices. Market risks arise due to the possible movement in foreign currency exchange rates, indices and securities' values underlying these instruments. In addition, because of the law margin deposits normally required in relation to notional contract sizes, a high degree of leverage may be typical of a forward contract and may result in substantial losses to the sub-funds. Forward contracts are generally subject to liquidity risk.

12 Fair value information

23.192

The sub-funds' financial instruments are measured at fair value on the date of statement of assets and liabilities. Fair value estimates are made at a specified point in time, based on market conditions and information about the financial instruments. Usually, fair values can be reliably determined within a reasonable range of estimates. For certain other financial instruments including dividend receivable, interest receivable, subscription receivable, amounts due from brokers, other receivable, redemption payable, amounts due to brokers, distribution payable, tax payables and other payables, the carrying amounts approximate fair values due to the immediate or short-term nature of these financial instruments.

Valuation of financial instruments

The sub-funds' accounting policy on fair value measurements is detailed in significant accounting policies in note 2(d)(iv).

The sub-funds measure fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements.

- Level 1: Inputs that are quoted market prices (unadjusted) in active markets for identical instruments.
- Level 2: Inputs other than quoted prices included within Level 1 that are observable either directly (i.e. as prices) or indirectly (i.e. derived from prices). The category includes instruments valued using: quoted market price in active markets for similar instruments; quoted prices for identical or similar instruments in markets that are considered less than active; or other valuation techniques in which all significant inputs are directly or indirectly observable from market data.

Level 3: Inputs that are unobservable. This category includes all instruments for which the valuation technique includes inputs not based on observable data and the unobservable inputs have a significant effect on the instrument's valuation. This category includes instruments that are valued based on quoted prices for similar instruments but for which significant unobservable adjustments or assumptions are required to reflect differences between the instruments.

The fair values of financial assets that are traded in active markets, such as equities and debt securities which are listed on exchanges or have daily quoted prices are based on quoted market prices or dealer price quotations. For all other financial instruments, the sub-funds determine fair value using valuation techniques.

The sub-funds use widely recognised valuation models for determining the fair value of financial instruments which do not have quoted market prices in an active market. Valuation techniques include comparison to quoted prices for identical instruments that are considered less than active and other valuation models.

The following analyses financial instruments measured at fair value at the date of the statement of assets and liabilities by the level in the fair value hierarchy into which the fair value measurement is categorised.

For the year ended 31 March 2023, HSBC Asia Pacific ex Japan Equity Volatility Focused Fund obtained services through commission sharing arrangements on transactions amounting to US\$69,383,678 (2022: Nil). Commission which amounted to US\$40,952 (2022: Nil) is paid from the Sub-Fund on these transactions. HSBC Evolving Asia Equity Fund obtained services through commission sharing arrangements on transactions amounting to US\$26,045,123 (2022: Nil). Commission which amounted to US\$12,238 (2022: Nil) is paid from the Sub-Fund on these transactions.

the brokers in consideration of transactions of the Sub-Fund

directed to the brokers.

15 Possible impact of amendments issued but not yet effective for the year ended 31 March 2023

Up to the date of issue of these financial statements, the HKICPA has issued a number of amendments which are not often effective for the year ended 31 March 2023 and which have not been adopted in these financial statements. These include the following which may be relevant to the Sub-funds.

Effective for accounting periods beginning on or after

Amendments to HKAS 1, Presentation of financial statements: Classification of liabilities as current or non-current

1 January 2024

Amendments to HKAS 1, Presentation of financial statements: Non-current liabilities with covenants

1 January 2024

Amendments to HKFRS 16, Leases: Lease liability in a sale and leaseback 1 January 2024

The sub-funds are in the process of making an assessment of what the impact of these amendments is expected to be in the period of initial application. So far it has concluded that the adoption of them is unlikely to have a significant impact on the sub-funds' results of operations and financial position.

SFC ESG related disclosure for the year ended 31 March 2023

Corporate Carbon Footprint (tonnes CO2e/USD mn):

The GHG emissions apportioned to the portfolio per million USD owned by the portfolio. Each holding's contribution to the carbon footprint of the portfolio is calculated on an equity ownership basis using the Enterprise Value (EVIC) of the companies. The carbon footprint of the fund is the sum of these contributions, normalised by amount owned.

$$\frac{\sum_{n}^{i} \left(\frac{current\ value\ of\ investment_{i}}{investee\ company's\ enterprise\ value_{i}} \times investee\ company's\ Scope\ 1\ and\ 2\ GHG\ emissions_{i}\right)}{current\ value\ of\ all\ investments\ (\$M)}$$

Coverage:

This indicates the proportion of the fund for which data can be sourced.

Assumption/data limitation:

This GHG consists to sum of the carbon emissions (scope 1, 2 and 3) of issuer divided by enterprise value, multiplied by the weight of the investment. Enterprise Value, including cash (EVIC) in million Euro are sourced from AM's reporting vendor FactSet. It is a measure of carbon emissions ownership, as it takes into account the proportion of emissions per investment, relative to the total size of the issuer value. However, carbon footprint can fluctuate without a change in carbon emissions as a result of changes in issuer value. Total carbon footprint is the sum of all issuer carbon footprint, divided by the value of the portfolio.

Data limitation: Carbon emissions (Scope 1, 2 & 3) are primarily based on company carbon disclosures, or estimated by S&P Trucost in the absence of company reports. It is worth noting the lack of coverage of scope 3 GHG emissions and some niche asset classes (such as Small Caps, High Yield or emerging markets issuers). These gaps are due to companies not reporting emissions and it is not appropriate to estimate non-reported emissions for niche asset classes or sub-industries.

It is important to note that we decided to zero down the carbon emission for internally approved green bonds – i.e. green bonds for which "greenness" has been ascertained and approved by a fully-fledged HSBC AM committee. This option has been set in the absence of a more accurate and systematic assessment which would consist in applying to the concerned bond a reduced CHG emissions based on the financed projects / use of proceeds. The same abatement ("zeroing") will apply similarly to portfolio position and corresponding benchmark components.
