## Schroder International Selection Fund Global Energy

A Accumulation USD | Data as at 31.03.2024

### Important Information

The fund invests primarily in equity and equity-related securities of companies in the energy sector.

- The fund invests in equity securities would subject to equity investment risk.
- The fund invests in concentrated sector and subjects to higher level of risks than a fund investing in a more diversified portfolio/strategy.
- The fund may invest in smaller companies which are relatively less liquid and more volatile than larger companies.
- The fund invests in the emerging and less developed markets which may be subject to greater risks, including ownership and custody risks, political and economic risks, market and settlement risks, etc..
- There is no assurance that hedging strategies employed will fully eliminate the currency exposure, and hedging transactions may preclude investors from benefiting from an increase in the value of the fund currency.
- The fund may use derivatives to meet its investment objective. Derivatives exposure may involve higher credit risk and counterparty risk, liquidity risk and valuation risk. In adverse situations, the fund may suffer significant losses from their derivative usage for hedging.
- For distribution share classes/units, the distribution rate is not guaranteed. Distribution yield is not indicative of the return of the fund. Distributions may be paid out of the capital of the fund at the Manager's discretion. This amounts to a return or withdrawal of part of the amount you originally invested or capital gains attributable to that and may result in an immediate decrease in the net asset value per share or decrease in the value of units of the relevant Distribution Units.

You should not make any investment decision solely based on this document. Please read the relevant offering document carefully for further fund details including risk factors.

### Investment Objectives

The Fund aims to provide capital growth in excess of the MSCI World SMID Energy index after fees have been deducted over a three to five year period by investing in equity and equity related securities of companies in the energy sector.

## Schroder International Selection Fund Global Energy

A Accumulation USD | Data as at 31.03.2024

### Return of USD 10,000

**Past Performance is not a guide to future performance and may not be repeated. The value of investments and the income from them may go down as well as up and investors may not get back the amounts originally invested. Exchange rate changes may cause the value of any overseas investments to rise or fall. Performance data does not take into account any commissions and costs, if any, charged when units or shares of any fund, as applicable, are issued and redeemed.**

The chart is for illustrative purposes only and does not reflect an actual return on any investment.

Returns are calculated NAV to NAV (which means performance does not include the effect of any initial charges), net income reinvested, net of fees.

### Benchmark and corporate action information

This fund does not have the objective of sustainable investment or binding environmental or social characteristics as defined by Regulation (EU) 2019/2088 on Sustainability-related Disclosures in the Financial Services Sector (the "SFDR"). Any references to the integration of sustainability considerations are made in relation to the processes of the investment manager or the Schroders Group and are not specific to the fund.

The Schroder ISF Global Energy fund was launched in June 2006 to accommodate a transfer of shareholders from the Schroder Energy Hong Kong Unit Trust (launched on 30.09.1987) to the Schroder ISF SICAV. The Schroder ISF Global Energy fund was launched in June 2006 to accommodate a transfer of shareholders from the Schroders Energy Hong Kong Unit Trust (launched on 30.09.1987) to the Schroder ISF SICAV.

#### Benchmarks: (If applicable)

Some performance differences between the fund and the benchmark may arise because the fund performance is calculated at a different valuation point from the benchmark. The target benchmark has been selected because it is representative of the type of investments in which the fund is likely to invest, and it is, therefore, an appropriate target in relation to the return that the fund aims to provide. The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the benchmark. The investment manager will invest in companies or sectors not included in the benchmark in order to take advantage of specific investment opportunities.
